

Free Training Opportunity

Course # G 361

Flood Fight Operations

March 28-29, 2023

8:00 AM to 5:00 PM each day

Johnson Co Emergency Management
4529 Melrose Ave, Iowa City

Course Description:

This course addresses community planning and response options for riverine flooding. While it does not deal with specialized flooding situations such as alluvial fan floods, coastal floods, flash floods, or floods related to ice jams, the same basic planning and response procedures could apply in these unique situations. Effective community planning is critical to successful flood operations.

Target Audience:

A wide variety of partners for this course includes the following:

Emergency managers, public works, first responders, local officials, US Army Corp of Engineers, elected officials, and those responsible for planning/preparing/managing the response to a flood

Additional Information:

- 1) Travel and meals will be on your own, adequate time for lunch will be provided
- 2) This multi-day course is supported with Homeland Security Grant Program (HSGP) funding. You may request lodging reimbursement if you traveled an excess of 50 miles one-way and an Iowa resident.

Prior to start of class, email your lodging reimbursement request to HSEMDTraining@iowa.gov limited to the first 10 registrants who respond prior to start of class.

All other travel will be on your own if the above doesn't apply or requested.

Please follow the current CDC guidelines, and if you feel ill, have a temperature, or have a sore throat, stay home.

Prerequisites:

NONE
